

Our Network

As a business connectivity aggregator Stream Networks have access to a large network footprint, allowing us access to some 2000 leased line Ethernet fibre nodes; across multiple tier one providers with network reach extending to not just the UK, but dedicated MPLS and VPLS connectivity worldwide.

- State of the art aggregator network with access to multiple tier 1 carriers
- Capacity is managed to ensure the network does not extend above 40% at any point
- State of the art Cisco built network offering VPLS, MPLS and BGP Internet Transit
- Nationwide Ethernet Network with over 2000 network nodes
- London Metro Ethernet network connecting over 4000 post codes
- Multiple London Datacentres
- Worldwide VPLS and MPLS Ethernet Connectivity
